One compact FRP unit. A full dual-treatment process.

ECOTREAT lite combines anaerobic and aerobic biological treatment, then chlorine disinfection — turning raw sewage into clean, reusable water inside a single prefabricated tank.

WHY ECOTREAT LITE

**Protects groundwater**
Fully treats sewage — nothing harmful leaches into soil or your borewell.

**Reuse every drop**
Treated water is clean enough for gardening, flushing and washing.

**90% less electricity**
Energy-efficient automation runs on a fraction of a conventional STP's power.

**Installs in 3–5 days**
Prefabricated and plug-and-play — delivered and commissioned within a week.

**Whisper silent**
Runs quietly enough for any home — no noise, no disturbance to neighbours.

**Tough FRP body**
Fibre-reinforced plastic shell resists corrosion, built to last for decades underground.

Garden & Landscaping
Irrigation for lawns and ornamental plants

Toilet Flushing
Cisterns run on treated, reused water

Washing
Outdoor cleaning, cars & driveways

TREATED OUTLET QUALITY

<20 BOD MG/L	<50 COD MG/L	<20 TSS MG/L	<100 FECAL COLIFORM MPN/100ML
---------------------------	---------------------------	---------------------------	--

Outlet quality exceeds CPCB discharge norms across the board — treated effluent is safe for reuse in flushing and irrigation, and fully compliant across all State Pollution Control Boards.
